## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 29, 2006 has been entered.

### ***Election/Restrictions***

2. Applicant is reminded that a restriction requirement remains in effect. The claims were searched and examined only to the extent that they read on the elected amidoamine fabric softeners. No claims can pass to issue until all non-elected subject matter has been deleted from the claims.
3. As applicant's response did not distinctly point out the alleged errors in the restriction requirement, it has been treated as an election without traverse and the requirement is made FINAL.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 1751

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 2, 4, 7-9 and 11-13 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 10/803,749. Although the conflicting claims are not identical, they are not patentably distinct from each other because the '749 claims essentially the same subject matter as the present claims, except that the oil presently claimed in part (b) does not explicitly comprise a perfume. However, it would have been obvious at the time that the invention was made to use a perfume oil in the granules presently recited, because in the surfactant art, perfumes are the oils most commonly encapsulated in granules which encapsulate an oil. In addition, claim 4 specifically recites a perfume as a constituent of the oil.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The previously submitted terminal disclaimer was signed by an attorney who is not of record in the case.

***Allowable Subject Matter***

6. Claims 1, 2, 4, 7-9 and 11-13 would be allowable if the double patenting rejection were overcome and the claims were amended to delete non-elected subject matter.

7. The following is an examiner's statement of reasons for allowance: Applicant's arguments are persuasive. While the reference makes it obvious to make a granule comprising starch, applicant has shown persuasively that the term "starch granule" has an art-accepted meaning that is different from what is disclosed in the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Applicant's efforts to advance prosecution are appreciated. This action is NOT FINAL.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318.
